***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-5, drawn to a wheel lift attachment, classified in class 254, subclass 133R.
  - II. Claims 6-9, drawn to a method of lifting a wheel of a vehicle and performing maintenance on the wheel, classified in class 29, subclass 402.04.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process as claimed can be practiced by another materially different apparatus such as one that does not require an elastomer cover block fixed to a bracket.
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
4. A telephone call was made to Mr. David Emhardt on February 28, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

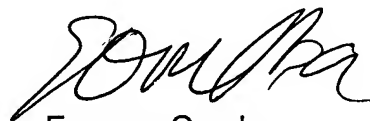

Art Unit: 3726

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
